

March 2021

Dear Centerville Clinics, Inc.:

For 55 years, health centers have delivered comprehensive, culturally competent, quality primary health care to patients regardless of their ability to pay. Health centers advance a model of coordinated, comprehensive, and patient-centered care, integrating medical, dental, behavioral health, substance use disorder, and patient support/enabling services.

The Health Center Program requirements serve as the foundation of the Health Center Program, supporting this innovative and successful model of primary care. The Health Resources and Services Administration (HRSA) conducts Operational Site Visits to provide an objective assessment and verification of each health center's compliance with the Health Center Program requirements.

Upon completion of your organization's most recent virtual Operational Site Visit Report, HRSA determined that Centerville Clinics, Inc., has successfully demonstrated compliance with all Health Center Program requirements. In recognition of your organization's commitment to program compliance, HRSA is pleased to present you with the enclosed Health Center Program Requirements Operational Site Visit Certificate.

Thank you for your commitment to providing quality primary health care services to your community.

Sincerely,

A handwritten signature in black ink, appearing to read "James Macrae", is positioned above the printed name.
